Mrs. Ann Sussman, Mr. Jim Yarin, Mrs. Maureen Greer, Mrs. Leslie Hogan and Mr. Antonio Santoro of the Transportation Advisory Committee (TAC) were present. Mrs. Sussman stated 2 ½ years ago they were approached by the Board of Selectmen to get pro-active and more involved, and to prepare a report on public concerns over the growth of traffic in the Great Road corridor, the future impact of new development, and the need to provide for safer traffic and pedestrian/bike operations. This provided the impetus for a study and the proposed plan to improve Great Road Corridor. They described the TAC Great Road Corridor Report and TAC Sidewalk Design Guidelines for Great Road. The report builds upon prior sidewalk survey efforts to identify and document areas that are in need of sidewalks. TAC proposes a set of strategies, called the

Streetscape Design Guideline to be integrated into the site plan application process. They are approaching the Planning Board for input and how to implement it.

The Planning Board comments/concerns:

- The Department of Public Works should be contact and discuss issues with them.
- Crosswalks are needed.
- Sight distances could be an issue in some areas with the buffer area on the sidewalk.
- Who will take care of the trees or plants in the buffer area.
- Trees may not survive in the sidewalk buffer area due to our winter weather and salt use.
- How costly will it become?
- How many accidents - people walking and cars that travel on Great Road?
- Need a priority list and what areas deserve attention first.
- The entire corridor is too much, try to do it in small sections.

The Board Chairman thanked Mrs. Ann Sussman and members of TAC for their work, time, and effort to explain the project.
